Protein Interface Analysis Summary Report

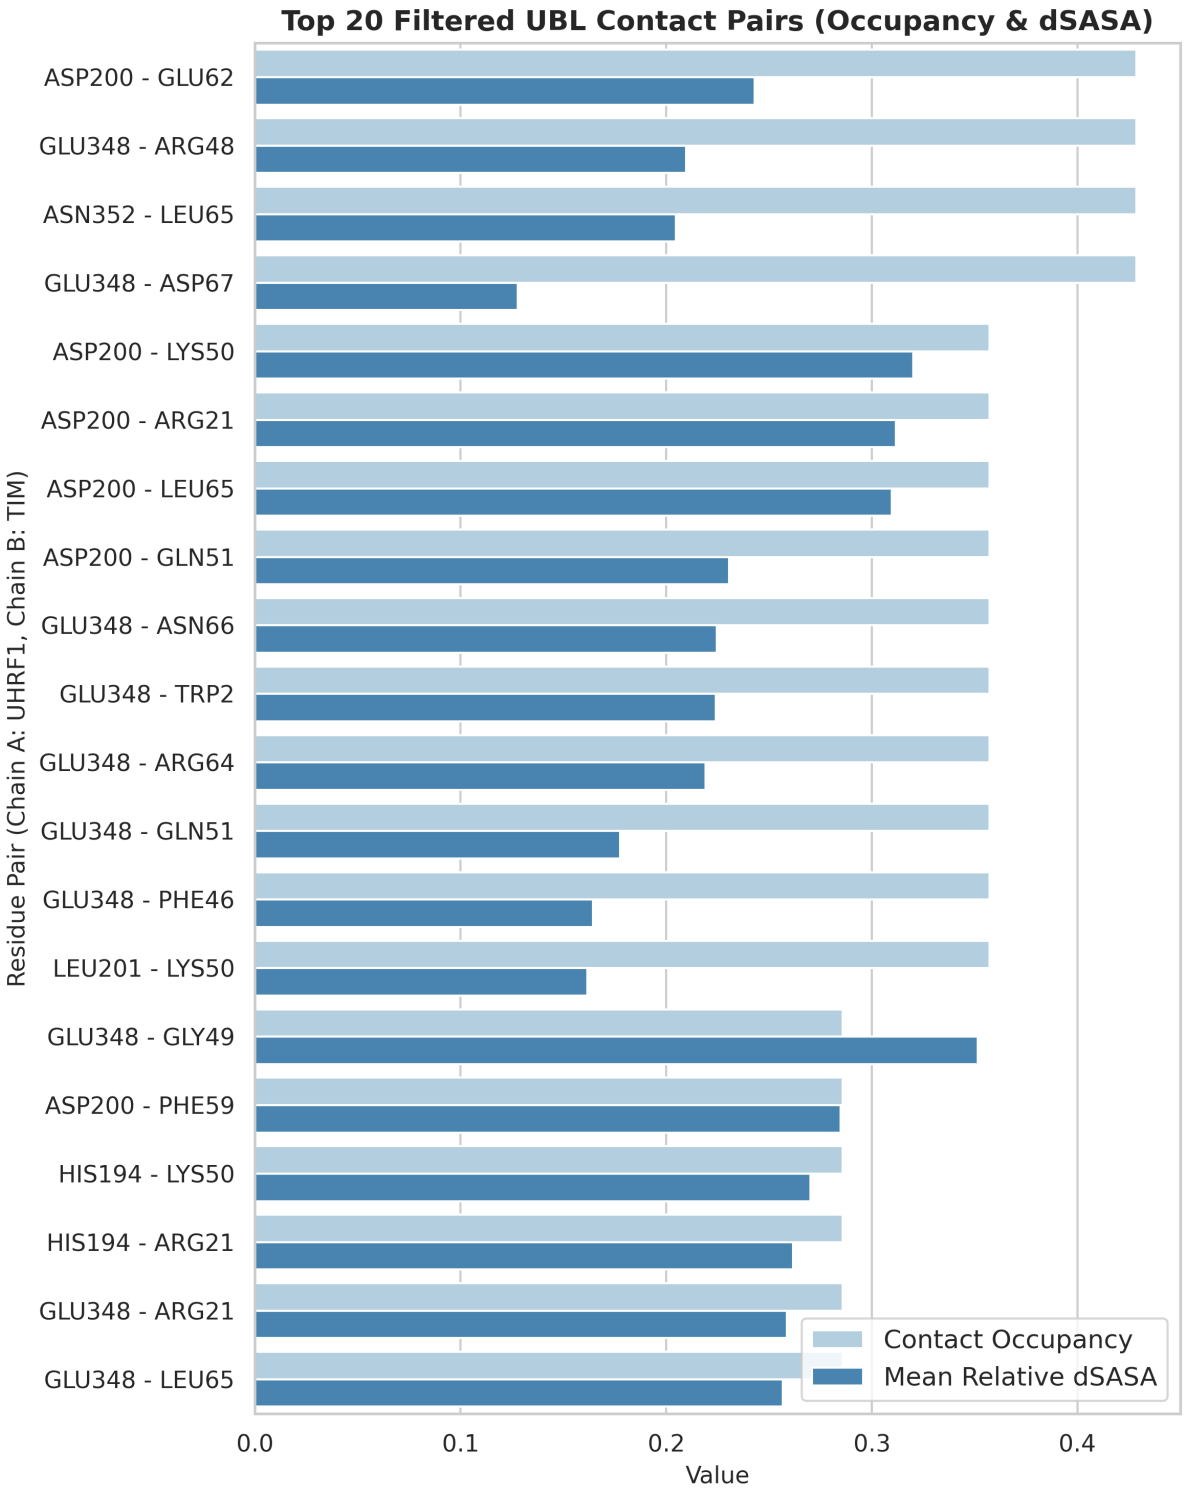

System Definitions & Chain Mapping:
• **Chain A (Chain 1):** Corresponds to **UHRF1** (Ubiquitin-like, with PHD and ring finger domains 1)
• **Chain B (Chain 2):** Corresponds to **TIM** (Timeless N-terminal domain, **TIM-NTD**)
• **Analyzed Complexes:**
  - **UBL:** TIM-NTD (Chain B) x UHRF1-UBL (Chain A)
  - **SRA:** TIM-NTD (Chain B) x UHRF1-SRA (Chain A)

This report compiles interface space scatter distributions and top-scoring contact pairs based on double threshold criteria (Contact Occupancy >= 0.5 and Mean Relative dSASA >= 0.2).

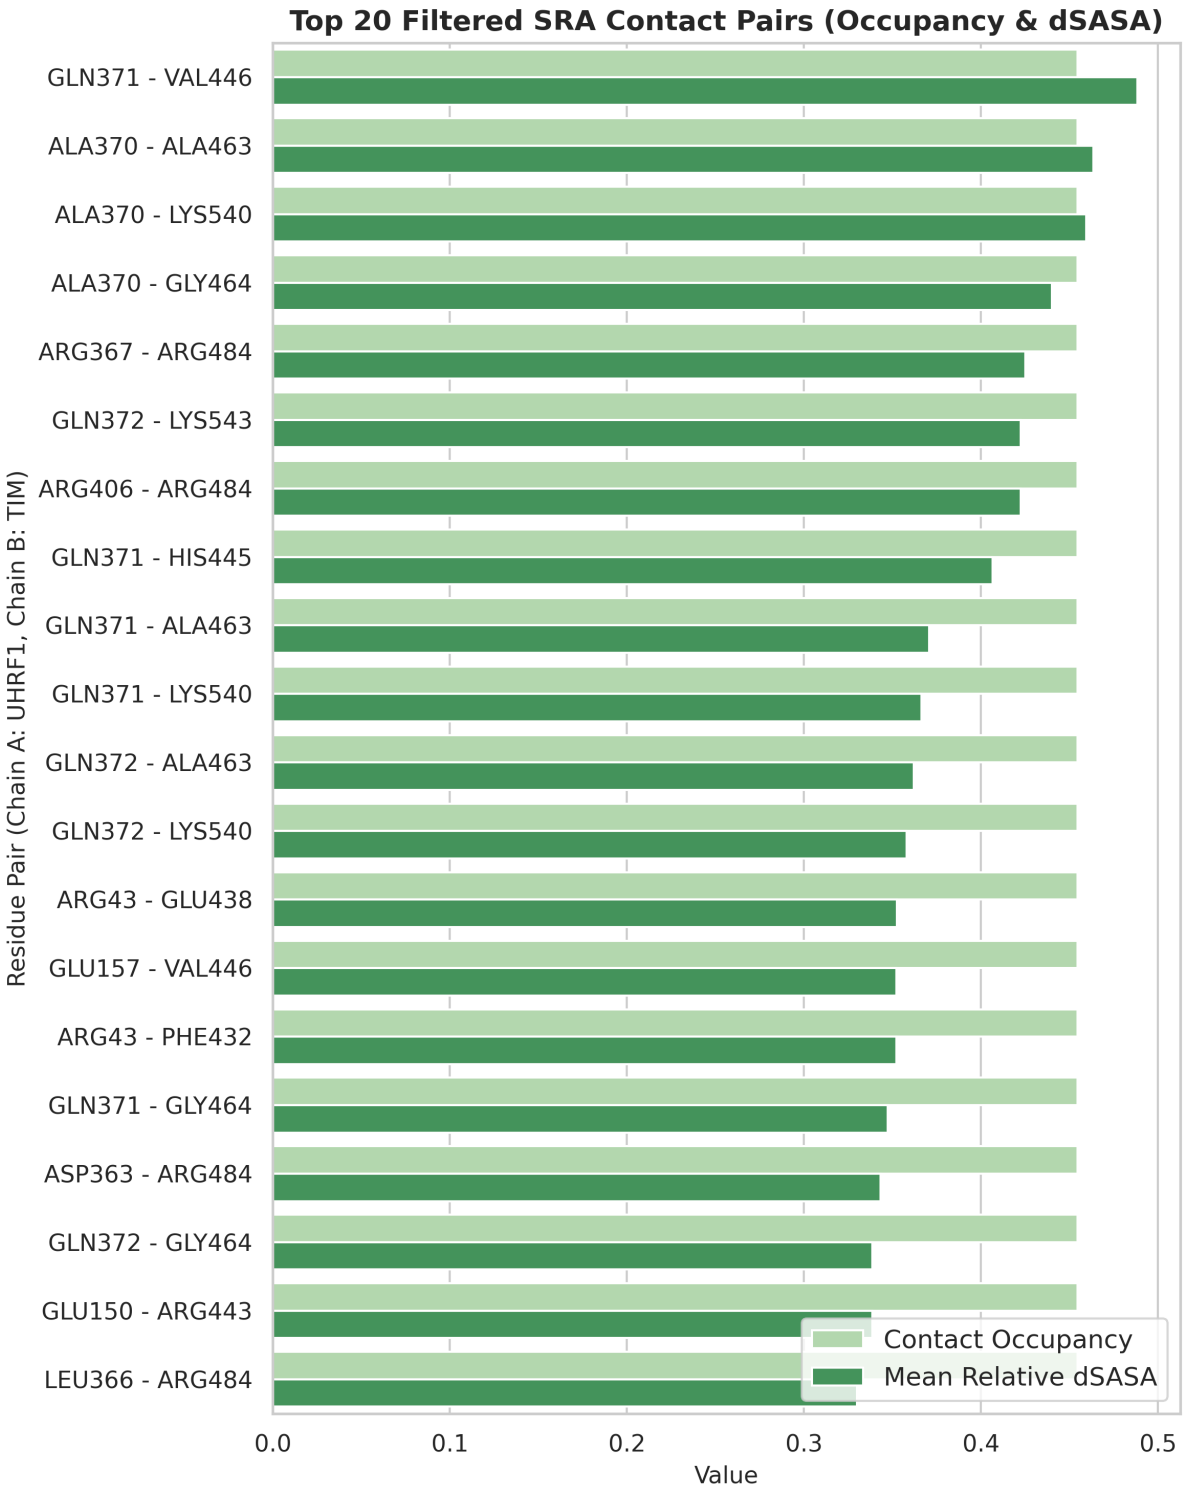

1. Residue Interface Space Overview

2. Top 20 Filtered UBL Contact Pairs (Chain A: UHRF1, Chain B: TIM)

3. Top 20 Filtered SRA Contact Pairs (Chain A: UHRF1, Chain B: TIM)

4. Detailed Data Tables
